

HALIMAT OLUBUKOLA SANUSI

DATA ANALYST

Address: Lagos, Nigeria | Email: halimatthanni@gmail.com |
Phone No: (+234) 8167030173 | [LinkedIn Profile](#) | [GitHub](#) | [Portfolio](#)

Professional Profile

A result driven Data Analyst with 2+ years of experience in data analysis, visualization, and statistical techniques to uncover insights and support decision-making. Proficient in SQL, Excel, Power BI, and Python, with expertise in cleaning, transforming, and interpreting datasets. Skilled in building dashboards, identifying trends, and storytelling with data for both technical and non-technical stakeholders. Strong understanding of data modeling, performance & growth tracking, and analytical problem-solving, with a track record of improving data accuracy, optimizing reporting processes, and supporting strategic decisions.

Skills

Data Visualization | Storytelling with Data | Exploratory Data Analysis | Data Cleaning & Transformation | KPI Tracking | Performance Metrics | Dashboard Development | Statistical Analysis | Forecasting | Modelling | A/B Testing | Reporting & Documentation | Trend & Pattern Identification | Problem Solving | Cross-Functional Collaboration | Stakeholder Communication | Analytical Thinking | Business Insights | Process Optimization | Critical Thinking | Decision-Making Support | ETL | Good Communication | Data Manipulation | Leadership | Teamwork

Tools:

Microsoft Excel (Pivot Tables, Power Query) | Power BI | SQL | PostgreSQL | Python (NumPy, Pandas, Matplotlib) | Jupyter Notebook | Google Colab | GitHub | Tableau (basic exposure) | Google Data Studio | Google Sheet | Looker

Work Experience

Emerj

Data Analyst

Dec 2024– Till Date

- Extract, clean, and structure data from multiple sources, including public datasets, social platforms, and digital tools, to support product and market analysis.
- Perform user segmentation and behavioral analysis to identify patterns and insights that inform product and growth strategies.
- Compiled a structured lead database of 30+ publicly sourced teacher contacts to support outreach and market validation.
- Improved reporting process efficiency by 30% through automation in Power BI.
- Translate business and product questions into structured analysis, developing data-backed hypotheses and validating them using quantitative and qualitative data.
- Conduct keyword and audience analysis to identify high-intent user behavior and support targeted acquisition strategies.
- Build and maintain structured datasets for outreach and market validation, improving data accessibility and usability for stakeholders.

HNG Tech

Data Analyst Intern

Feb 2025 – Dec 2025

- Developed a state-level palm oil profitability model using available research data.
- Designed a fully interactive Power BI Profitability Simulator incorporating What-If parameters, state slicers, rainfall correlations, and profit KPIs.
- Designed a full Power BI SEO performance dashboard (Top keywords, bank visibility dominance, average ranking, correlation vs revenue).
- Produced a marketing-focused insights report identifying the banks with the strongest SEO visibility and the drivers behind their search performance.
- Developed analytical queries to identify high-value customers, transaction frequency patterns, inactivity indicators, and customer lifetime value.
- Investigated anomalies in transaction data in a financial data analysis to flag potential fraud patterns, reducing false positives by 20%.

PropCrowdy

Junior Research Data Analyst

Dec 2024 – Till Date

- Performed exploratory data analysis to identify trends, patterns, and gaps in housing accessibility and market distribution.
- Developed reports and visualizations to communicate insights to stakeholders, including policymakers, investors, and business teams.
- Monitored and improved report engagement by 35% through analysis of 200+ property listings, enabling stakeholders to access housing insights more effectively.
- Conducted exploratory data analysis to uncover affordability gaps, housing deficits, and disparities impacting Lagos' 20+ million residents.
- Collaborated with RIRFHU teams to translate data findings into actionable recommendations for urban planning and real estate strategy.
- Enhanced distribution strategy by 20% by monitoring post-launch housing report performance, tracking downloads, citations, and media mentions.

Other Experience

Digital Media Marketer – PropCrowdy

2024 – 2025

Social Media Manager Associate – The Bulb Africa

2022 – 2023

Education

ALT SCHOOL OF DATA

Diploma in Data Analysis

ADEKUNLE AJASIN UNIVERSITY, AKUNGBA

Bachelor of Science in Geography and Planning Science

Training & Certification

Data Analysis – Alt School of Data

Data Analytics Pro – HerTechTrail

Data Analytics – Hillcity Edge Tech

Fundamentals of Data Analysis – She Leads Africa

Power BI Data Visualization – PwC Switzerland (Forage)

Data Visualization: Empowering Business with Effective Insights – Tata

Microsoft Power BI (PL-300) – Badge of Completion

Microsoft Learn – Data Fanatics

Project

Manufacturing Downtime Analysis [Project \(Dashboard\)](#)

- Delivered actionable insights that can support process optimization, operator training, and downtime reduction strategies
- Developed key performance metrics including Line Efficiency (%), Total Downtime, Net Operating Time, and Efficiency Gap (Actual vs Expected) using DAX
- Designed a 3-page interactive dashboard covering performance overview, downtime analysis, and operator-level insights for decision-making

US Candy Distributor: Sales, Profitability & Target Performance [Analysis \(Dashboard\)](#)

- Built an end-to-end data analysis solution in Microsoft Excel (Power Query, Power Pivot, DAX) to transform raw transactional data into actionable business insights.
- Developed 10+ DAX measures to track key business KPIs such as Total Revenue, Profit Margin, Year-over-Year Growth, Target Achievement %, and Average Shipping Duration.
- Identified key business insights, including revenue concentration among top products, regional profitability gaps, and variations in shipping efficiency, enabling data-driven decision-making.
